

HOLE SAW KITS

Starrett offers fourteen different hole saw kits designed to serve the specific needs of various trades and end use applications. These include kits designed for use by electricians, plumbers and locksmiths, as well as kits for general maintenance use, utility and automotive trades and general industrial applications.

Each kit is designed with a sturdy carrying case that protects the investment you have made in your tools. They include hole saws and accessory items pre-selected to cover a full range of applications to ensure you arrive on the job with the right tools at your disposal.

FASTCUT™ BI-METAL HOLE SAW KITS

Electricians' and Plumbers' Hole Saw Kit – No. KV290

Nine of the most popular sizes of our bi-metal high speed steel hole saws engineered for installing piping, tubing, conduit and cable in residential, commercial, industrial plumbing and electrical fields.
