

# Intenss<sup>™</sup> PRO-ST

*Replaces Gladiator Emperor*

Ideal for production cutting of structurals, Intenss PRO-ST is a bi-metal blade with a heavy set made of M-42 high-speed steel.

- ▶ Heavy set teeth provide extra blade clearance to minimize binding or pinching when beam stresses are relieved and/or when bundles move during cutting.
- ▶ Triple-tempered M-42 high speed steel teeth with 8% cobalt; HRc 67-69.
- ▶ Resists heat, abrasion and shock, allowing for faster cutting.
- ▶ Tooth design reduces vibration and noise levels for smooth, quick cutting and prevents chipping and stripping of teeth.
