

HAND HACKSAW BLADES

Bi-metal unique® High Speed Steel Safe-Flex® Hacksaw Blades

A patented solid-state diffusion process produces the industry's most advanced bi-metal hand hacksaw. With 170% more high-speed steel weld area and a precision ground tooth profile, blade fracture and breakage is greatly reduced. Blades cut faster and last longer.

Bi-metal unique® High Speed Steel Safe-Flex® HEAVY-DUTY Hacksaw Blades

These conventional bi-metal hacksaw blades offer a sturdier construction. An excellent choice for demanding hand use or light power-assisted machine applications.

GREY-FLEX™ CARBON STEEL Hacksaw Blades

These all-purpose blades are an economical alternative when cutting mild steel, copper, brass, aluminum and other like materials. The blades feature an all carbon construction with a hardened cutting edge and flexible back.

CARBIDE GRIT Rod Saw Blades

Constructed of a tough steel alloy rod that has been coated by carbide grit, this unique rod saw blade effectively cuts abrasive materials. The flexible design makes this tool a good choice for awkward cutting applications or in hard to reach applications.

CARBIDE GRIT Hand Hacksaw Blades

These blades feature a durable steel construction with a uniform application of carbide grit bonded to the cutting edge. An ideal tool for cutting ceramics, fiberglass, plastics, asbestos, glass resins or any other abrasive materials that cannot be effectively cut by conventional blades.
