The ProSite® Protractor takes error-prone calculations out of the process of miter cuts. Simply set your saw to the angle that you read. Upside down or backwards, the reading is always correct.

The ProSite® Protractor saves time and reduces waste. The tool is ideal for carpenters, plumbers and all building trades that require the measuring and transforming of angles. It is also an invaluable tool for home use.

**505A-7 Miter Saw Protractor**

The outside scale and center arrow, show the angle for a single cut.

The inside scale and arrow on the handle, show the angle for a miter joint.

Smooth pivot assembly for smooth and precise operation.

Constructed from durable 1/4" aluminum.
