

HIGH-SPEED SAWING OF TOUGH MATERIALS FROM COMPOSITES TO METALS.

Advanz™ FS is one of our carbide-tipped band saw blades. These blades can saw tough materials that bi-metal blades cannot cut. Advanz™ FS features teeth ground from high-quality, micro-grained carbide cylinders welded to a tough, ductile backing material. These carbide-tipped blades offers exceptional fatigue, shock and wear resistance when cutting aluminum castings, fiberglass, masonite, plastics, composite materials and abrasive woods.

FEATURES

- New micro-grained carbide selected for toughness, wear and shock resistance.
- Improved carbide-to-back bonding.
- Triple chip tooth geometry.
- Tough ductile back.
- Smooth surface finish.
- Faster cutting speeds.
- Improved strip resistance.
