

Pneumatic Reciprocating Saw Blades

Starrett now offers a line of bi-metal unique® saw blades for the pneumatic reciprocating saws widely used in auto body shops, metal fabricating and other applications.

Features & Specifications

- Manufactured with bi-metal unique saw technology
- Faster cutting longer blade life
- Blades for metal and a variable pitch
- Multi-purpose blade for composites, steel sheets and wood

bi-metal
unique® Saw
Technology

bi-metal unique® saw technology, a patented Starrett process, joins two strips of high speed steel to a backing steel utilizing solid-state diffusion bonding (rather than traditional weld or laser bonding) for 170% more weld contact area, to reduce fracture and breakage.

After initial use, the teeth develop a groove in the thin center of backing material. As a result, the cutting stroke produces dual chips that are more easily removed from the cut.

In controlled tests, bi-metal unique® cut 20% faster and lasted 22% longer than five competing premium blades.

Pneumatic Reciprocating Saw Blades								
Blade	TPI	Length x Width x Thickness (all blades)	5 Pack		20 Pack		50 Pack	
			Cat. No.	EDP	Cat. No.	EDP	Cat. No.	EDP
BS226 Metal	32		BS226-5	13001	BS226-20	13005	BS226-50	13009
BS227 Metal	24	3-5/8 x .024 x 1/2"	BS227-5	13002	BS227-20	13006	BS227-50	13010
BS228 Metal	18	(92 x 0.6 x 13mm)	BS228-5	13003	BS228-20	13007	BS228-50	13011
BS229 Multi	14 - 18		BS229-5	13004	BS229-20	13008	BS229-50	13012

Available in packages of 5, 20 and 50 blades.
